Ajith KS *Automation Engineer / Process Automation Specialist*

imajithks@gmail.com 9995516020 Bangalore iajithks ajith-ks Portfolio

Profile

Process Automation Engineer with 7 years of experience specializing in automation development, workflow optimization, and systems integration. Skilled in leveraging Groovy, Powershell, Python, SQL, REST APIs, and scripting technologies to design and implement end-to-end automation solutions. Experienced in requirements gathering, process analysis, and cross-functional collaboration. Proven track record in reducing manual workload, improving operational efficiency, and developing scalable automation solutions that align with business objectives.

Skills

Automation & Development
Python, PowerShell, Groovy, VBA macros, REST API integrations, workflow automation, ServiceNow automation, process orchestration, ETL process automation, report automation, Power Automate, IGNIO, Apache POI, script development, automation solution design

Systems & Infrastructure
Unix/Linux environments, Active Directory automation, cloud automation, ServiceNow, NetIQ IDM, database management, API integration, system orchestration, infrastructure automation

Process Analysis & Engineering
Business process mapping and optimization, workflow design and implementation, requirement gathering and documentation, fit-gap analysis, process efficiency measurement, UAT testing, cross-functional collaboration, stakeholder management, process documentation, functional analysis

Data Engineering & Analytics
SQL, MySQL, PostgreSQL, ETL processes, data extraction and transformation, data pipelines, Python data libraries (Pandas, NumPy), data visualization (Power BI, Tableau), data modeling, predictive analytics, KPI tracking

Professional Experience

Automation Engineer / System Engineer 01/2019 – present | Bangalore
Tata Consultancy Services

- **Process Automation: Led automation initiatives** using **Groovy scripting** and **API integrations**, reducing manual effort by **15+ hours weekly** and improving operational efficiency
- **Workflow Optimization: Orchestrated automated workflows** for incident management, user access provisioning, and reporting, **cutting processing time by 40%**
- **Systems Integration: Engineered automation solutions** integrating multiple systems through **REST APIs**, ensuring **seamless data flow** across platforms
- **ServiceNow Automation: Enhanced ServiceNow integrations** and built **custom automation scripts**, improving **incident resolution and service request processing efficiency by 30%**
- **Cross-functional Collaboration: Collaborated across teams** to gather requirements, design solutions, and implement process improvements **aligned with business objectives**
- **User Access Automation: Systematized security protocols** by automating user access and permissions management for **over 1000+ users** using **Active Directory** and **NetIQ IDM**
- **Reporting Automation: Constructed automated reporting systems** using **SQL**, **Groovy**, and **Excel**, reducing manual report generation time by **80%**
- **Data Validation: Engineered automated data validation checks** using **SQL** and **Groovy**, ensuring **99% data accuracy** for business reporting

Projects

User Access Lifecycle Automation & Security Compliance System
- **Architected** an end-to-end user access validation framework that automatically audits user provisioning and deprovisioning across multiple enterprise systems (**SuccessFactors**, **NetIQ IDM**, **Active Directory**, **ServiceNow**) using **Groovy scripts** and **PowerShell automation**
- **Programmed** cross-system integration logic with **PowerShell** and **REST APIs** to extract, compare, and validate user account status, including privileged access accounts, ensuring proper security controls
- **Rolled out** daily **automated compliance reporting**, eliminating manual verification gaps, **enhancing security posture**, and ensuring **timely access deprovisioning** for all offboarded employees

Technologies: Groovy, PowerShell, REST APIs, SuccessFactors, NetIQ IDM, Active Directory, ServiceNow

Automation Execution Summary Dashboard using ignio & Power BI
- **Designed** and implemented a **workflow in ignio** to generate detailed execution summaries by integrating data from multiple sources including **PostgreSQL** and **ServiceNow**
- **Structured** six PostgreSQL tables (**Use Case Master, Monthly Volume, KPI, Workitem Cleaned, Incident, Request**) to store and relate execution metadata, ticket handling, and performance indicators
- **Crafted SQL and Groovy scripts** to extract **JSON-based execution data**, integrate **ServiceNow** incidents via **REST APIs**, and update summaries, enabling **Power BI dashboards** with **real-time business insights**

Technologies: ignio, PostgreSQL, SQL, Groovy, REST API, ServiceNow, Power BI

Exchange Shared Mailbox Automation System
- **Delivered** an **end-to-end automation solution** for **Exchange shared mailbox management**, eliminating manual steps and reducing processing time by **85%**
- **Integrated ServiceNow** with **Exchange Online** using **Groovy** and **REST APIs** to fetch approved requests and automate **PowerShell-based mailbox actions**
- **Deployed automated request closures** with detailed **audit trails**, ensuring process transparency while handling **200+ mailbox operations monthly with zero errors**

Technologies: PowerShell, Exchange Online, Groovy, REST APIs, ServiceNow, Automation Queue Management

Education

PG Program in Data Engineering 2022 – 2023
Great Learning

BCA 2014 – 2017
AJK College of Arts and Science

Msc.IT 2022 – 2025
Centre for Distance and Online Education, Bharathiar University

Certificates

- Azure Data Fundamentals
- Azure Fundamentals
- Google IT Automation with Python

Courses

Certified Business Analysis Professional
HRD University

Complete Business Analytics Certification Program
CoachX
